Mon, 03 Dec 2018 05:06:00 GMT World energy consumption - Wikipedia - Stellar evolution is the process by which a star

changes over the course of time. Depending on the mass of the star, its lifetime can range from a few million years for the most massive to trillions of years for the least massive, which is considerably longer than the age of the universe. The table shows the lifetimes of stars as a function of their masses.
